

Vehicle registration form

for exhibition on the grounds of Messe Kassel GmbH

Based on the regulations of the fire protection ordinance and the technical guidelines of the Messe Kassel GmbH

Event reference:

Event name	Display period of the vehicle

Location reference:

Hall number	Booth number

Information about the MV exhibiting/involved party:

Exact name and phone number of the booth tenant as stated in the event registration	
Name of the on-site responsible person	<u>All time</u> contactable mobile phone number the responsible person

Information about the displayed vehicles:

Vehicle type (e.g. Car, RV, Special vehicle, Trailer, Truck, ...)	Color	Licence plate

		☐	☐	☐
Manufacturer	Model	Petrol	Diesel	Electric

	May be filled out by Messe Kassel: ☐ Fz. Inertgasbetankt ☐ Fz. Offensichtlich Beanstandet
Vehicle value - rounded - in Euro	Art/Begründung der Beanstandung:

Excerpt from the technical guidelines of the Messe Kassel GmbH:

9 | Displayed vehicles in event areas

Every kind of during an event displayed/exhibited vehicles – indoors and outdoors - are subject to special legal safety regulations.

The vehicles are being parked at the owner's own risk and liability!

The vehicles must be registered with Messe Kassel GmbH by using the registration form at least 20 working days (Monday to Friday) before the start of the event period.

Motorvehicles with hydrogen-/LPG-/natural gas engines are prohibited indoors!

Moving vehicles during public hours is not permitted!

It must be assured that vehicles can not be started, moved or driven by unauthorized persons at any time!

Only technically safe vehicles are allowed to be displayed, from which no danger to people, property and/or the environment emanates.

Fuel tanks of indoor displayed motor vehicles have to be filled minimally only!

The fuel-gauge warning light must be illuminated to state „low fuel“!

Petroltanks of indoor displayed mv may need to be flooded with an inert gas.

This can be serviced with a fee after consultation with Messe Kassel GmbH.

Engines are only permitted to be running while driving/maneuvering the motor vehicle.

The have to be cut off immediately even for short stops!

Running the main engine or auxiliary drives indoors just for demonstration of technical systems, or operation auxiliary vehicle heaters is forbidden! Also it is not allowed to run the engine for recharging the battery!

Outdoors it is allowed to run engines to demonstrate functions as the constant running time does not exceed ~5 minutes in each 15 minute period.

Indoor displayed electric vehicles of all kind – including (motor)bikes-/recreational-/sport- vehicles and regardless their chemical and technical battery design – must not exceed the SOC value or 10%!

Auxiliary- and starter batteries are not subjected to that SOC limit!

These batteries may need to be disconnected at indoor displayed vehicles.

The trickle charging and recharging of any type of battery indoors – regarding the the stated limits – must not be done unattended at any time!
